Distribution type	Distribution
Dividend per share as of 29/04/2025	GBP 0.21
Minimum investment	GBP -
Benchmark	Bloomberg Developed Markets Index EUR converted to GBP

SFDR article 9

The fund has sustainable investment objectives aligned with SFDR article 9 criteria. These objectives are:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

Triodos Global Equities Impact Fund aims to generate positive impact and competitive returns from a concentrated portfolio of equities issued by large-cap companies offering sustainable solutions.

The fund mainly invests in equities of companies in developed countries and whose products or services contribute to at least one of the following transitions: resource transition, energy transition, food transition, societal transition or wellbeing transition.

Highlights

- Triodos Global Equities Impact Fund generated a return (after costs) of 3.47%, while the benchmark yielded 2.75%.
- A positive monthly performance concealed notable volatility driven by persistent fears of a bubble in the artificial intelligence trade and the technology's disruptive power on software, traditional media, and communications business models. Conversely, investors rotated into cyclical and defensive sectors. Geopolitical and policy uncertainty arose from the US Supreme Court's decision to strike down Trump's global tariffs and the president's response with a new 15% global tariff under a different legal authority, as well as ongoing US tensions with Iran.
- The fund benefited from its overweight to defensive and cyclical sectors such as Industrials and Consumer Staples, despite missing out on the positive contribution from Energy (no exposure). Despite AI bubble fears, technology infrastructure names such as TSMC, KLA, Murata, and Deutsche Telekom performed strongly thanks to surging demand for AI-related hardware, components, and manufacturing equipment. In contrast, some companies issued weaker-than-expected guidance that spooked investors: Novo Nordisk (also a trial failure), Palo Alto (AI disruption fears), and Vestas (policy headwinds).

Net Return in %

As per end of February 2026

	1M	3M	YTD	1Y	3Y avg	5Y avg
Fund	3.47	3.57	3.81	6.90	9.49	5.94
Benchmark	2.75	1.82	2.77	13.24	16.27	13.21

Calendar Year Net Return in %

	2021	2022	2023	2024	2025
Fund	6.95	-10.71	12.80	7.99	6.40
Benchmark	22.86	-8.41	17.34	20.98	12.57

All returns stated have been calculated based on net asset values, including reinvestment of dividends where applicable. Past performance does not predict future returns. Please note that the costs charged have an impact on your return. Benchmark: Bloomberg Developed Markets Index EUR. In the past, the fund used one or more different benchmarks, which are displayed for the period(s) up to the respective date(s) of each change. Details regarding benchmark changes can be found at the end of this document.

Deutsche Telekom	21.0	Adyen	-20.6
Deere	20.2	Vestas	-15.3
Darling Ingredients	17.3	Palo Alto Networks	-15.2
Carlisle Companies	17.0	EssilorLuxottica	-12.7

Principal Adverse Impact Indicators (PAIs)

GHG intensity of investee companies: The GHG intensity is a relative measure of greenhouse gas (GHG) emissions. It is the amount of GHG produced per unit of revenue generated by the company, measured in tonnes of CO₂ per EURm generated in revenue. The carbon intensity is then weighted using the portfolio weight to get a weighted average for the portfolio.

Non-recycled waste ratio: For each company the non-recycled waste ratio is the total amount in metric tons of non-recycled waste produced divided by the amount invested in EURm. This is expressed as a weighted average.

Excessive CEO pay ratio: This metric measures the ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

Risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The product may be exposed to risks, such as concentration risk and currency risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

When investing in the fund, please take into account all the characteristics and/or objectives of the promoted fund as described in its prospectus. Further, please take notice of the sustainability aspects of the fund as found [here](#).
